Base: 2.17

Definition: medium grey-brown sandy soil with slight grey sandy soil mottling, charcoal flecking, whole clam and oyster shell. Shell flecking. More whole shell in Level 1 than level 2.

Matrix and Stratigraphy: _____

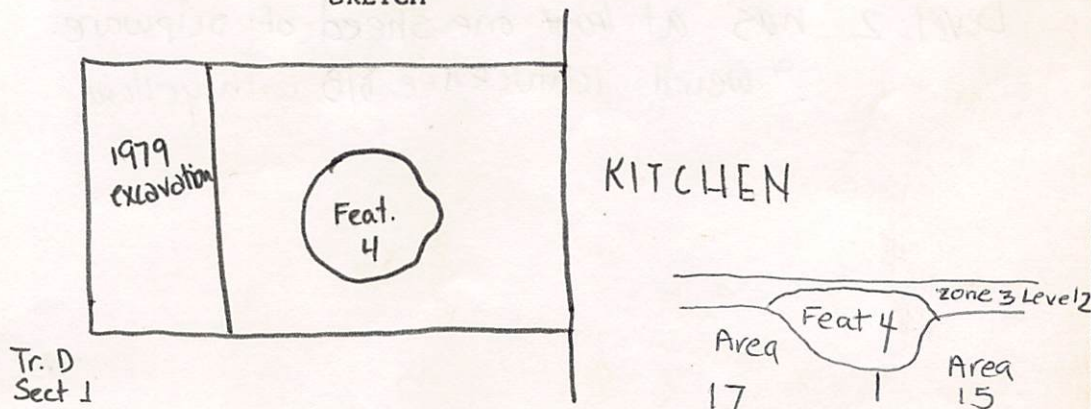

Underlies: Zone 3 Level 2In Matrix of: Zone 3 Level 2Intrudes into: Area 15 and Area 17Overlies: Area 15 and Area 171. F.S. No's: 153, 1604. Photographs: 262. Map Reference: 7 6

5. Strat. Record Reference: _____

3. Pages in Notes: 47-48; 50; 52

Comments: It was not possible to level the pit without destroying a significant amount of Feature 4. Apparently the zone has been excavated too deep in one area, not allowing for the possibility of discovering a feature near the top of the level. Feat. 4 will be excavated in levels, + level one consisted of that portion →

SKETCH

needed to bring the feature down to level in order to map.
BAD

Level 1 seems to have pearlware, British.

Level 2 has at least one sherd of slipware.

* weird Ichtucknee B/B with yellow
