7-2-79

full over clear

Beginning excavation of trench C, SA-26-1. Being augmented by FSU Archaeological Unit. Local. Re: FSU field notes.

Trench C - 1.5M north to south 3.0M east to west

Level 00 - moderate:
 NW corner - 94.5N 126.8E
 N corner - 94.5N 129.8E
 SE corner - 93N 129.8E
 SW corner - 93N 126.8E

Remained approx. 30cm of overburden. P.O. 50) prior to setting stakes.

Zone 1 Gray-brown w/ shell fleck.

Map 2 Zone 1 - NW: 1.69
 SW: 1.67
 SE: 1.70
 NE: 1.70

Remains Zone 1 in 15cm level

Note: Following 35% of Zone 1, level 1 as it appears disturbed. Will be done for succeeding levels until they appear undisturbed.

Zone 1, base of level 1 at 1.55MBD. in NE corner of D -

Area 11 white, yellow/brown mottled moderate shell. Map #1, Photo #1

Area 2 yellow-white brown mottled also in NE corner of D. Map #1, Photo #1

Remains A1

Remains A2 - suspended at 3.00MBD. Remains Z1, Z2 35% covered

Remains A3 on map #2

It 00MBD:

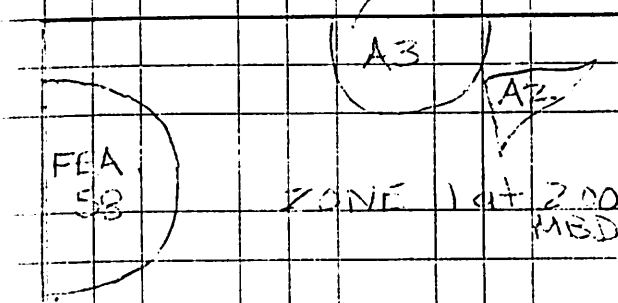

FEATURE - 58K black-brown semi-circular, heavy inclusion of bone, shell fleck, charcoal in NW end of I. Map #2, Photo #2

Note - top of this feature at 1.70 (1)

redesignated as FEA.59

[Area 3] concentration of whole shell bones
N side of T. Map #2

7-4-79
Clear + hot
fuel crew

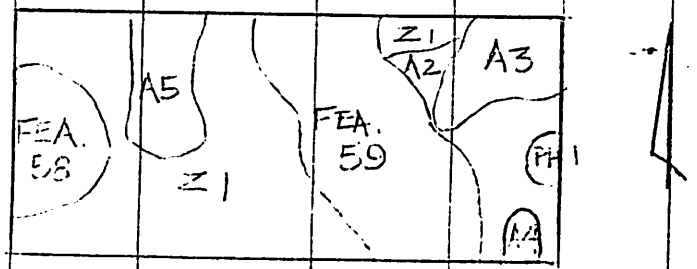

due to extreme dryness of soil + extremely
retreating T. Area 3 much larger
redesignated as FEA.59 Map #3
extends roughly N to S across T.
Much rubble, shell, etc. brown soil.

New [Area 3] adjacent to feature 59 in
NE corner of T. Black + yellow mottled
soil w/ few inclusions Map #3

[Area 4] unice + brown mottled area
in SE corner of T. Adj. to FEA.59. Map #3

Area 5 in N balk, W 1/2 of I. White + brown mottled w/ some yellow. Shell black. Map #3

Feature 11 in E. balk. May soil, few inclusions. Fine + soft grade soil

APLAE 3+4+5/FEA 59/PH1 - Photo #3.

Photographing Feature 58 at 2.12 MBD
Feature partially excavated - exposed some areas of orange compacted clay w/ bits of charcoal + ash in it.
Photo #4.

Remaining Feature 59.

Area now appears to extend under portions of FEA 58. Will remove - Map #4

July 5, 1979

Clear + Warm
Crags out - full sun

Continuing to remove features. 59.

Area 2 is beginning to look suspicious like well wash in consistency + color. Undercutting A3 in NE corner of I.

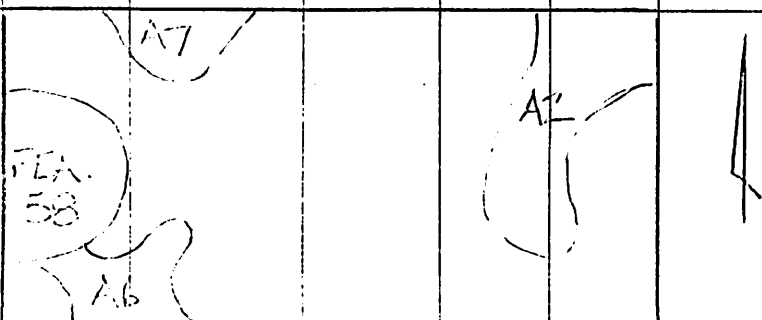

Area 3 now appears to be part of Zone 1, Level 3. Removed + screened as such. Name goes for Area 5.

Remaining Zone 1, Level 3

At 2.03 MBD:

Area 6, dark-brown soil w/ local black concentration in SW corner of I.
Adjacent to FEA. 58. Photo #4

Area 7, light gray soil w/ heavy concentration of shell flecks in NW wall of I. Photo #4

7-6-79
gleat warm
Crappy out

Photographing A2 - photo #5.
Removal A6 + A7
Removal ZONE 1, LEVEL 3

Photographing French C at 2.10 MED
Photo #6 = Matrix - Zone 1, lev. 3
Intrusions = A7, A8, A9, A10, A11
A12, A13, A14

Also - see map #5

Photo #7 - same as #6 with
intrusions outlined

A7 now appears larger - remapped #5

[Area 8] dark black-brown w/ heavy whole
mussel shell concentration in SW
corner of II. Underlies FEA. 58

[Area 9] brown soil w/ heavy whole
mussel shell. In S. bank. on N. end.

[Area 10] gray w/ some yellow soil.
Thick - raised floor. Adj. to A7 + A8

[Area 11] dark black soil. somewhat
gross w/ almost no inclusions
In NW 1/2 of II. through center.

[Area 12, 13, + 14] yellow w/ some gray
soil w/ moderate shell. Looking
appears to be related though
unattached. May be possible
pasture (?) will excavate separately
until certain.

[Area 15] Underlies Feature 39
A dark black soil where heavy
concentration of whole oyster
shell. Is partially undercutting
Zone 1, Level 3.

July 9, 1979
overcast + rain
full crew

morning-lab

Afternoon: Trench C 5A-26-1
Removing A8. suspended at
2.46 MBD is undercutting zone.

Removing A9. Base at 2.24
Removing A11. suspending A11
Removing A10 - base at 2.30

A7 cuts into A10 somewhat on
N + E sides

July 10, 1979
clear + warm
full crew

Removing A4 - out
Removing extension of A7
Removing remainder of Zone 1, Level 3.

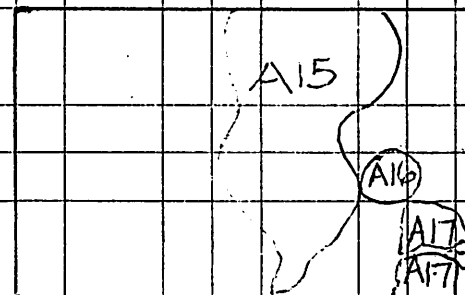

Area 15: Note - part of A15 in N
side of \square mistakenly removed.

31

As part of FEA 5.9 however it was
screened as A15 + mapped in.
Mapping all A15 on map #6
Extends across \square from N to S
although rather irregular
in shape. Also on map #6 is:

[Area 16] brown soil w/ very heavy
concentration of crushed shell
adjacent to A15

[Area 17] Coguina rubble + some brick
in SE corner of \square .

7-11-79
overcast + warm
full crew

Leveling E end of \square to photo A2
at 2.23 MBD - photo #9. Also

at this elevation posthole 2 appears.

Posthole 2 round, white sand, minor shell inclusions in E end of \square , N side. Map # 7, Photo # 9

Photo # 10 - Base of A15 in sterile 2.35MBD

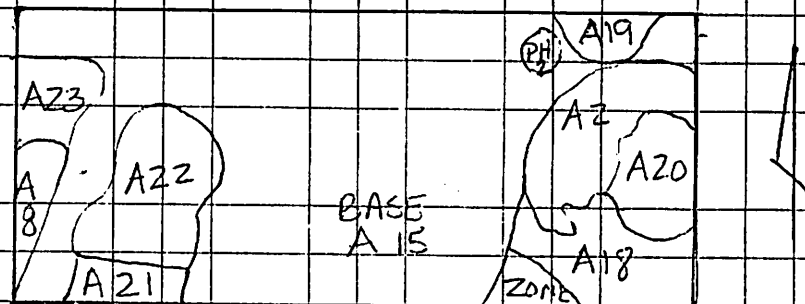

Map # 7: AZ, A18, A19, A20
PH 2

Area 18 in SE corner of \square . Looking at the profile it is apparent that an error was made in detecting this area. Top is at 1.77MBD. Mottled area w/ much building rubble which apparently cut through the southern portion of AZ.

Area 19 Black soil w/ slight yellow mottling & moderate whole & crushed shell in N balk. Adjacent to N side of AZ.

Area 20 In E balk in between AZ + A18. May be part of Zone 1

32.
however, because of its position in relation to AZ + A18, will remove separately.

Removing Zone 1, Level 4 from W 1/2 of \square Encountered:

Area 21 black, very few inclusions in S balk of \square . Underlies A9 adjacent to A22. Map # 7, Photo # 11

Area 22 mottled brown-black-yellow heavy whole & crushed shell Map # 7, Pl 11

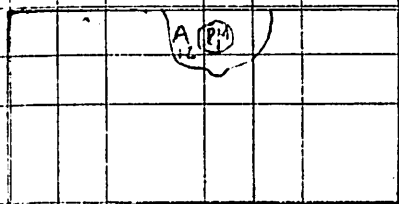

Area 23 Gray-brown w/ heavy inclusions of bone & crushed shell in W balk. May be part of A8 Map # 7, Pl # 11

(TRENCH C (continued from pg. 28)
